
280LED

Product Description

Device used for providing a specialized source of light for illumination of a site of medical intervention. It provides a high intensity, high colour rendering field of light that minimizes shadows and the emission of heat.Adjustable Operating field diameter with focus

Automatic switch from mains to batteries in case of power failure
With battery status indicator
Removable autoclavable handle
Power supply: The supplier has to supply the right voltage, plug and socket type that fit the country it is delivering the goods to. The country of destination would be stated in the UNFPA's

Mobile on heavy sturdy stand,
On 4 antistatic ball-bearing swivel castors, 2 with breaks
Spring balanced articulating arm
Low centre of gravity for optimal stability and reach

Main Technical Data

280LED	Cold light operating lamp (deep)
Illuminance	≥50,000Lux
Colour temperature	4000±500k
color reduction index(Ra)	97
Total irradiance	171W/m²
Size of light field	150mm
LED bulb quantity	19PCS
LED bulb life(hr)	≥50,000
Rated power of bulb	3.2V/1W
Power supply voltage	AC110-240V/50-60Hz
Bulb	LED bulb
